

International Conference
“Analytic Functions and
Quasiconformal Mappings”
Friday, 30 May 2014

- 9:30 Opening
- 9:35-10:05 **María José González**, Universidad de Cádiz
Quasiconformal mappings and the corona problem
- 10:15-10:45 **Vesna Manojlović**, Univerzitet u Beogradu & SANU
On bilipschicity of quasiconformal harmonic mappings
- 10:55-11:25 **Albert Clop**, Universitat Autònoma de Barcelona
Manifolds of quasiconformal mappings and the nonlinear Beltrami equation
- 11:30-11:50 COFFEE BREAK
- 11:50-12:20 **Ignacio Uriarte-Tuero**, Michigan State University
The Krzyz conjecture revisited
- 12:30-13:00 **Kari Astala**, Helsingin Yliopisto
Bloch functions and the asymptotic variance of the Beurling transform

Aula 520, Módulo 17
Departamento de Matemáticas
Universidad Autónoma de Madrid

Organizers: *Daniel Faraco* and *Dragan Vukotić*

Financed by grants: 301179, European Research Council and MTM2012-37436-C02-02, MINECO
